

Abstract

5 A portable drive unit (10) for operating a handheld power tool (70) by means of
suction and/or blown air, is portable in an especially handy and space-saving way
in that it has a housing (11), which is designed as a case (13) that is closable with
a lid (24), and that its air feeding power is adapted to the power requirement of the
handheld power tool (70), and it serves to store at least one such or similar
10 handheld power tool (70), particularly with its accessories, such as air-carrying
tubes and hoses.
